authoritative and bestselling textbook detailing the many aspects of using
wind as an energy source wind energy explained provides complete and
comprehensive coverage on the topic of wind energy starting with general
concepts like the history of and rationale for wind energy and continuing
into specific technological components and applications along with the new
recent developments in the field divided into 16 chapters this edition
includes up to date data diagrams and illustrations boasting an impressive
35 new material including new sections on metocean design conditions
wind turbine design wind power plants and the electrical system fixed and
floating offshore wind turbines project development permitting and
environmental risks and benefits turbine installation operation and
maintenance and high penetration wind energy systems and power to x
wind energy explained also includes information on modern wind turbines
covering the design and their many components such as the rotor drive

train and generator aerodynamics of wind energy covering one dimensional momentum theory the betz limit and ideal horizontal axis wind turbine with wake rotation environmental external design conditions such as wind waves currents tides salinity floating ice and many more commonly used materials and components such as steel composites copper and concrete plus machinery elements such as shafts couplings bearings and gears modern design methods including probabilistic design environmental effects and mitigation strategies for wind project siting and the role of public engagement in the development process this book offers a complete examination of one of the most promising sources of renewable energy and is a great introduction to this cross disciplinary field for practicing engineers it may also be used as a textbook resource for university level courses in wind energy both introductory and advanced

this book constitutes the refereed proceedings of the 5th international symposium on integrated uncertainty in knowledge modelling and decision making iukm 2016 held in da nang vietnam in november december 2016 the iukm symposia aim to provide a forum for exchanges of research results and ideas and experience of application among researchers and practitioners involved with all aspects of uncertainty modelling and management

strong roots in basic science and research enhance clinical practice this book is a rich source of information for basic scientists and translational researchers who focus on musculoskeletal tissues and for orthopedic and trauma surgeons seeking relevant up to date information on molecular biology and the mechanics of musculoskeletal tissue repair and regeneration the book opens by discussing biomaterials and biomechanics with detailed attention to the biologic response to implants and biomaterials and to the surface modification of implants an important emerging research field finite element analysis mechanical testing standards and gait analysis are covered all these chapters are strongly connected to clinical applications after a section on imaging techniques

musculoskeletal tissues and their functions are addressed the coverage including for example stem cells molecules important for growth and repair regeneration of cartilage tendons ligaments and peripheral nerves and the genetic basis of orthopedic diseases state of the art applications such as platelet rich plasma were included imaging is a daily practice of scientists and medical doctors recent advancements in ultrasonography computerized tomography magnetic resonance bone mineral density measurements using dual energy x ray absorptiometry and scintigraphy was covered following conventional radiography basics further extensive sections are devoted to pathology oncogenesis and tumors and pharmacology structure is always related with function surgical anatomy was therefore covered extensively in the last section

this volume gathers the latest advances innovations and applications in the field of cable robots as presented by leading international researchers and engineers at the 4th international conference on cable driven parallel robots cablecon 2019 held in krakow poland on june 30 july 4 2019 as part of the 5th iftomm world congress it covers the theory and applications of cable driven parallel robots including their classification kinematics and singularity analysis workspace statics and dynamics cable modeling and technologies control and calibration design methodologies hardware development experimental evaluation and prototypes as well as application reports and new application concepts the contributions which were selected through a rigorous international peer review process share exciting ideas that will spur novel research directions and foster new multidisciplinary collaborations

buku ini lahir dari keinginan penulis untuk memberikan kontribusi bagi pengembangan pembelajaran fisika dengan cara mengintegrasikan konsep fisika dalam permainan tradisional indonesia dan untuk memelihara permainan tradisional indonesia yang sudah mulai terlupakan

Indonesia sebagai negara yang kaya akan berbagai ragam budaya memiliki banyak permainan tradisional. Permainan-permainan ini telah diwariskan turun temurun dan tidak terpisahkan dari kehidupan masyarakat. Permainan-permainan ini tidak hanya menghibur tetapi juga menyimpan kekayaan intelektual yang tak ternilai serta mempunyai nilai edukatif. Akan tetapi, kita sering kali tidak menyadari bahwa di balik keseruan dan keunikan permainan tersebut tersimpan prinsip-prinsip fisika yang mendasar. Melalui buku ini, pembaca diharapkan dapat menemukan perspektif yang berbeda tentang keunikan permainan tradisional dari sudut pandang ilmu fisika. Dengan buku ini, juga pembaca diharapkan dapat memahami penerapan konsep fisika dalam kehidupan sehari-hari melalui permainan tradisional.
